**BETA'S ICONIC WRENCH**

*A stylish, slim shape enhanced by a slender profile, lighter to the touch.*

The strength, resilience and ergonomic design of the Beta wrench reach even higher values, to provide users with the best possible tool. The manufacturing process is carried out in our factories in Sovico and Sulmona, on the basis of state-of-the-art automation technology and the best trained workers.

**ERGONOMIC**

The offset ring has a 15 degree angle to protect the hand. The shape is obtained from a die; it is not bent later.

**POWERFUL**

Torque values more than doubled compared to the requirements to be satisfied under ISO 1711.

**STRENGTH**

Remarkable strength: in case of improper use, the wrench buckles, without breaking suddenly and dangerously.

### Ultrasonic cleaning tank with special degas function

- Ultrasonic cleaning relies on fluid heating to effectively clean spare parts and metal pieces in general (carburetors, valves etc.)
- Digital display for temperature and cleaning time selection
- Two cleaning modes: "soft" and "normal"
- For normal cleaning, just use water at a temperature of 50/60 °C
- For more accurate cleaning, add non-foaming detergent solutions specific for ultrasonic tanks
- Using the degas mode speeds up air release throughout the tank, thereby improving ultrasonic cleaning efficiency

# FitEvolution

Seven uniquely designed models, available in several colours and materials, ranging from mesh to microfibre, to satisfy the most demanding users' requirements.

## THE PATENTED SYSTEM BETA FIT4YOU

TO CUSTOMIZE COMFORT  
IN THEIR SAFETY FOOTWEAR.

After several years of painstaking studying and designing, we developed the patented system, **FIT 4 YOU**. This state-of-the-art penetration-proof insole pressing process allows three different **ETPU** inserts – each with different densities – to be combined, to provide three levels of comfort, thus satisfying every user's requirements.

### ETPU Inserts

ETPU is the core of the FIT 4 YOU system, ensuring a cushioning effect and energy return. Based on three provided inserts varying in density and colour, it allows both softness and support to be customized in the shoe, according to weight, height and personal requirements. This groundbreaking technology ensures optimal comfort while moving as well as during static breaks, thereby resulting in reduced joint stress and fatigue.

The patented system, **FIT 4 YOU**, is based on **3 provided ETPU** inserts, varying in density and colour, to allow the user to customize the shoe according to weight, height and personal usage requirements.

- Composite toe cap
- Composite fibre penetration-proof insole
- 3 ETPU inserts, with 3 different densities, for a customized shoe
- Heel stability support and traditional lacing.
- Dual-density polyurethane outsole
